

I am a single Dad with a young daughter who was referred to Western Community Action for assistance in finding an apartment. With their support I was not only able to find an apartment; I was able to acquire my own home through the MURL program there.

The staff at Western Community Action have been very supportive in working through different financial challenges. One of the challenges I have been working hard on is addressing the issues on my credit report. I have also received help through the transportation program and energy assistance program both offered at Western Community Action.

My dream is to someday have my own business and I believe that this will come true. Thank you Western Community Action for all the support and encouragement you have given my daughter and me.
