

I was referred to the program from a church member and set up an appointment to talk about assistance in the meetings we had I learned that Western Community Action was able to help me get caught up with my rent and get my finances stabilized so I could afford to manage them. I am a single mom with 2 children and coming from an abusive marriage and had an order for protection ordered and very unsure what to do or who to ask for help. In talking with my worker over time I realized I wanted to go back to school to get my RN degree and was going to work with Western Community Action in the FAIM program to pursue school which had been a life long dream for me. DO to health issues that arose I ended up not starting the FAIM program but still have pursued school with the help and direction from my worker. I have really appreciated all the assistance and help over the last year that they have helped me with and I truly believe I have become a better and stronger person due to this help.
