December 2011

Minnesota State Retirement System
State Patrol Retirement Fund
St. Paul MN

Dear Board of Directors:

Submitted in this report are the July 1, 2011 actuarial valuation results for the State Patrol Retirement Fund. The purposes of this report are to:

- Present Mercer's actuarial estimates of the Plan's liabilities and expenses as required by Minnesota Statutes, Section 356.215 and the Standards for Actuarial Work established by the State of Minnesota Legislative Commission on Pensions and Retirement (LCPR) for the Minnesota State Retirement System (MSRS) to incorporate, as MSRS deems appropriate, in its financial statements; and
- provide the actuarially required contribution for the fiscal year beginning July 1, 2011.

To the best of our knowledge and belief, the valuation was performed in accordance with the requirements of Minnesota Statutes, Section 356.215, and the requirements of the Standards for Actuarial Work established by the LCPR, including one modification regarding decrement timing. The LCPR approved this exception prior to the preparation of this report in order to ensure consistency and comparability. For more information about the decrement timing methodology, please refer to the *Actuarial Basis* section.

We are available to answer any questions on the material in this report or to provide explanations or further details as appropriate. Moreover, this report contains a Glossary of certain terms referenced in the report, which you may wish to consult before reviewing the report. The undersigned credentialed actuaries meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained in this report. In addition, Mr. Dickson meets the requirements of "approved actuary" under Minnesota Statutes, Section 356.215, Subdivision 1, Paragraph (c). We are not aware of any direct or material indirect financial interest or relationship, including investments or other services that could create a conflict of interest, that would impair the objectivity of our work.

Respectfully submitted,

Gary D. Dickson, FSA, EA, MAAA

Bonita J. Wurst, ASA, EA, MAAA

Highlights

Contributions

The following table summarizes important contribution information as described in the “Development of Costs” section.

Contributions	Actuarial Valuation as of	
	July 1, 2011	July 1, 2010
Statutory Contributions – Chapter 352B (% of Payroll)	31.00%	26.00%
Required Contributions – Chapter 356 (% of Payroll)	36.25%	33.84%
Sufficiency / (Deficiency)	(5.25%)	(7.84%)

The contribution deficiency decreased from (7.84%) of payroll to (5.25%) of payroll. The primary reasons for the improvement are the increase in contributions and gains due to lower than expected salary increases. These gains were partially offset by the recognition of deferred investment losses in the actuarial value of assets. A significant contribution deficiency remains. Without further changes or favorable actuarial experience, the funded status will deteriorate in the future. Plan changes affecting members first hired after June 30, 2010 are expected to ultimately reduce the cost of the plan, but have not yet had a material impact on the valuation results.

The *Plan Assets* section provides detail on the plan assets used for the valuation including a development of the actuarial value of assets (AVA). The market value of assets (MVA) earned 23.5% for the plan year ending June 30, 2011. The AVA earned 5.0% for the plan year ending June 30, 2011 as compared to the assumed rate of 8.50%, as required by Minnesota Statute.

The contributions received for the prior year were less than the amount actuarially required. This resulted in an increase of approximately \$5.0 million in unfunded liability and an increase of approximately 0.47% of payroll in this year’s required contributions.

Participant reconciliation and statistics are detailed in the *Membership Data* section. The *Actuarial Basis* section includes a summary of plan provisions and actuarial methods and assumptions used for the calculations in this report. The *Plan Accounting* sections detail the required accounting information for the Plan under GASB Statement No. 25 (as amended by GASB 50).

Changes in plan provisions are reflected in this report and summarized in the *Actuarial Basis* and *Effects of Changes* sections.

Principal Valuation Results

A summary of principal valuation results from the current valuation and the prior valuation follows. Any changes in plan provisions, actuarial assumptions or valuation methods and procedures between the two valuations are described after the summary.

	Actuarial Valuation as of	
	July 1, 2011	July 1, 2010
Contributions (<i>% of Payroll</i>)		
Statutory – Chapter 352B	31.00%	26.00%
Required – Chapter 356	36.25%	33.84%
Sufficiency / (Deficiency)	(5.25%)	(7.84%)
Funding Ratios (<i>dollars in thousands</i>)		
Accrued Liability Funding Ratio		
– Current assets (AVA)	\$ 563,046	\$ 567,211
– Current assets (MVA)	568,279	488,870
– Actuarial accrued liability	700,898	683,360
– Funding ratio (AVA)	80.33%	83.00%
– Funding ratio (MVA)	81.08%	71.54%
Projected Benefit Funding Ratio		
– Current and expected future assets	\$ 783,331	\$ 741,304
– Current and expected future benefit obligations	838,158	826,527
– Projected benefit funding ratio (AVA)	93.46%	89.69%
Participant Data		
Active members		
– Number	862	848
– Projected annual earnings (<i>000s</i>)	\$ 66,035	\$ 67,187
– Average annual earnings (<i>projected</i>)	\$ 76,607	\$ 79,230
– Average age	41.8	41.8
– Average service	12.6	12.7
Service retirements	700	684
Survivors	184	192
Disability retirements	48	48
Deferred retirements	38	39
Terminated other non-vested	15	14
Total	1,847	1,825

Effects of Changes

The following changes in plan provisions were recognized as of July 1, 2011:

- Member contributions increased from 10.4% to 12.4% of pay and employer contributions increased from 15.6% to 18.6% of pay beginning July 1, 2011.

The impact of this change was to decrease the contribution deficiency by 5.0% of pay.

Valuation of Future Post-Retirement Benefit Increases

A very important assumption affecting the valuation results is the expectation of future post-retirement benefit increases. The plan's accrued liability funding ratio (on a market value of assets basis and assuming 1.5% post-retirement benefit increases in all future years) is currently 81.1%. If the plan reaches a funding ratio of 90% (on a market value of assets basis) in the future, post-retirement increases will revert to the 2.5% level.

We performed a projection of liabilities and assets, using the 2011 valuation results as a baseline and assuming future experience follows the valuation assumptions (including future investment returns of 8.5%). In addition, the projection utilized the following methods and assumptions:

- Liabilities and normal cost assume future COLAs at 2.5% level payable for all years
- Cash flow assuming future COLAs at current 1.5% level
- Level normal cost as a percent of pay (assuming total payroll increases as assumed in the valuation for purposes of amortizing the unfunded liability). Plan changes affecting members first hired after June 30, 2010 are expected to ultimately reduce the cost of the plan, but have not yet had a material impact on the valuation results. We did not attempt to quantify this reduction.
- Current statutory contribution levels (i.e. not including potential contribution increases under the contribution stabilizer statutes).

Based on these assumptions and methods, the projection indicates that the funded status of this plan is not expected to reach 90% within the next 15 years of the projection.

The liabilities in this report are based on the assumption that the post-retirement benefit increase will remain at the reduced level of 1.5% indefinitely. We relied on direction from MSRS, including MSRS' interpretation of applicable Minnesota Statutes, on this issue. If we assumed future post-retirement benefit increases of 2.5% instead of 1.5%, the actuarial accrued liability would be \$764 million instead of \$701 million, resulting in a funded ratio of 74.4% (on a market value basis).

Important Notices

Mercer has prepared this report exclusively for the Board of Directors of the Minnesota State Retirement System (MSRS) and the Legislative Commission on Pensions and Retirement (LCPR); Mercer is not responsible for reliance upon this report by any other party. Subject to this limitation, MSRS may direct that this report be provided to its auditors in connection with audits of the Plan or its sponsoring entities.

The only purposes of this report are to:

- Present Mercer's actuarial estimates of the Plan's liabilities and expenses as required by Minnesota Statutes, Section 356.215 and the Standards for Actuarial Work established by the State of Minnesota LCPR for MSRS to incorporate, as MSRS deems appropriate, in its financial statements; and
- provide the actuarially required contribution rate for the fiscal year beginning July 1, 2011.

This report may not be used for any other purpose; Mercer is not responsible for the consequences of any unauthorized use.

Decisions about benefit changes, granting new benefits, investment policy, funding policy, benefit security and/or benefit-related issues should not be made on the basis of this valuation, but only after careful consideration of alternative economic, financial, demographic and societal factors, including financial scenarios that assume future sustained investment losses.

The State Board of Investment (SBI) is solely responsible for selecting the plan's investment policies, asset allocations and individual investments. Mercer's actuaries have not provided any investment advice to the Board of Directors or the SBI.

A valuation report is only a snapshot of a Plan's estimated financial condition at a particular point in time; it does not predict the Plan's future financial condition or its ability to pay benefits in the future and does not provide any guarantee of future financial soundness of the Plan. Over time, a plan's total cost will depend on a number of factors, including the amount of benefits the plan pays, the number of people paid benefits, the period of time over which benefits are paid, plan expenses and the amount earned on any assets invested to pay benefits. These amounts and other variables are uncertain and unknowable at the valuation date.

Because modeling all aspects of a situation is not possible or practical, we may use summary information, estimates, or simplifications of calculations to facilitate the modeling of future events in an efficient and cost-effective manner. We may also exclude factors or data that are immaterial in our judgment. Use of such simplifying techniques does not, in our judgment, affect the reasonableness of valuation results for the plan.

To prepare the valuation report, actuarial assumptions, as described in the *Actuarial Basis* section of this report, are used in a forward looking financial and demographic model to present a single scenario from a wide range of possibilities; the results based on that single scenario are included in the valuation. The future is uncertain and the plan's actual experience will differ from those assumptions; these differences may be significant or material because these results are very sensitive to the assumptions made and, in some cases, to the interaction between the assumptions.

Different assumptions or scenarios within the range of possibilities may also be reasonable and results based on those assumptions would be different. As a result of the uncertainty inherent in a forward looking projection over a very long period of time, no one projection is uniquely "correct" and many alternative projections of the future could also be regarded as reasonable. Two different actuaries could, quite reasonably, arrive at different results based on the same data and different views of the future. A "sensitivity analysis" shows the degree to which results would be different if you substitute alternative assumptions within the range of possibilities for those utilized in this report. We have not been engaged to perform such a sensitivity analysis and thus the results of

Important Notices

such an analysis are not included in this report. At MSRS's request, Mercer is available to perform such a sensitivity analysis.

Actuarial assumptions may also be changed from one valuation to the next because of changes in mandated requirements, plan experience, changes in expectations about the future and other factors. A change in assumptions is not an indication that prior assumptions were unreasonable when made.

The calculation of actuarial liabilities for valuation purposes is based on a current estimate of future benefit payments. The calculation includes a computation of the "present value" of those estimated future benefit payments using an assumed discount rate; the higher the discount rate assumption, the lower the estimated liability will be. For purposes of estimating the liabilities (future and accrued) in this report, you selected an assumption based on the expected long term rate of return on plan investments. Using a lower discount rate assumption, such as a rate based on long-term bond yields, could substantially increase the estimated present value of future and accrued liabilities.

Because valuations are a snapshot in time and are based on estimates and assumptions that are not precise and will differ from actual experience, contribution calculations are inherently imprecise. There is no uniquely "correct" level of contributions for the coming plan year.

Valuations do not affect the ultimate cost of the Plan, only the timing of contributions into the Plan. Plan funding occurs over time. Contributions not made this year, for whatever reason, including errors, remain the responsibility of the Plan sponsor and can be made in later years. If the contribution levels over a period of years are lower or higher than necessary, it is normal and expected practice for adjustments to be made to future contribution levels to take account of this with a view to funding the plan over time.

Data, computer coding and mathematical errors are possible in the preparation of a valuation involving complex computer programming and thousands of calculations and data inputs. Errors in a valuation discovered after its preparation may be corrected by amendment to the valuation or in a subsequent year's valuation.

Actuarial assumptions, including discount rates, mortality tables and others identified in this report, are prescribed by Minnesota Statutes Section 356.215, the LCPR, and the Board of Directors. These parties are responsible for selecting the plan's funding policy, actuarial valuation methods, asset valuation methods, and assumptions. The policies, methods and assumptions used in this valuation are those that have been so prescribed and are described in the *Actuarial Basis* section of this report. MSRS is solely responsible for communicating to Mercer any changes required thereto.

To prepare this report Mercer has used and relied on financial data and participant data supplied by MSRS and summarized in the *Plan Assets* and *Membership Data* sections of this report. MSRS is responsible for ensuring that such participant data provides an accurate description of all persons who are participants under the terms of the plan or otherwise entitled to benefits as of the valuation date that is sufficiently comprehensive and accurate for the purposes of this report. Although Mercer has reviewed the data in accordance with Actuarial Standards of Practice No. 23, Mercer has not verified or audited any of the data or information provided.

Mercer has also used and relied on the summary of plan provisions, including amendments, and interpretations of plan provisions, supplied by MSRS as summarized in the *Actuarial Basis* section of this report and on plan provisions stipulated by Minnesota Statute. We have assumed for purposes of this valuation that copies of any official plan document including all amendments and collective bargaining agreements as well as any interpretations of any such document have been provided to Mercer along with a written summary of any other substantive commitments. The Board of Directors is solely responsible for the validity, accuracy and

Important Notices

comprehensiveness of this information. If any data or plan provisions supplied are not accurate and complete, the valuation results may differ significantly from the results that would be obtained with accurate and complete information; this may require a later revision of this report. Moreover, plan documents may be susceptible to different interpretations, each of which could be reasonable, and that the different interpretations could lead to different valuation results.

MSRS should notify Mercer promptly after receipt of the valuation report if MSRS disagrees with anything contained in the valuation report or is aware of any information that would affect the results of the valuation report that has not been communicated to Mercer or incorporated therein. The valuation report will be deemed final and acceptable to MSRS unless MSRS promptly provides such notice to Mercer.

The information contained in this document (including any attachments) is not intended by Mercer to be used, and it cannot be used, for the purpose of avoiding penalties under the Internal Revenue Code that may be imposed on the taxpayer.

Supplemental Information

The remainder of the report includes information supporting the results presented in the previous sections.

- **Plan assets** presents information about the plan's assets as reported by the Minnesota State Retirement System and the Minnesota State Board of Investments. The assets represent the portion of total fund liabilities that has been funded.
- **Membership data** presents and describes the membership data used in the valuation.
- **Development of costs** shows the liabilities for plan benefits and the derivation of the contribution amount.
- **Actuarial basis** describes the plan provisions, as well as the methods and assumptions used to value the plan. The valuation is based on the premise that the plan is ongoing.
- **Plan accounting under GASB 25 (as amended by GASB 50)** shows the disclosures required by GASB Statement No. 25 as amended by GASB Statement No. 50.
- **Glossary** defines the terms used in this report.

Plan Assets

Statement of Plan Net Assets as of June 30, 2011 *(Dollars in Thousands)*

Development of Costs

Actuarial Valuation Balance Sheet *(Dollars in Thousands)*

The actuarial balance sheet is based on the principle that the long-term projected benefit obligations of the plan should be ideally equal to the long-term resources available to fund those obligations. The resources available to meet projected obligations for current members consist of current fund assets plus the present value of anticipated future contributions intended to fund benefits for current members. In the exhibit below, B.2 is the estimated present value of contributions to fund the normal cost rate for current members until their respective termination dates. Item B.1 is the present value of the total 31.00% statutory contribution net of normal cost and anticipated plan expenses during the period from the valuation date to the statutory unfunded amortization date.

The contributions made in excess of amounts required for current benefit payments are accumulated as a reserve to help meet benefit payments in later years. It is this reserve system which permits the establishment of a level rate of contribution each year.

				June 30, 2011
A.	Actuarial Value of Assets			\$ 563,046
B.	Expected future assets			
1.	Present value of fund's future statutory supplemental contributions			\$ 83,025
2.	Present value of fund's future normal cost contributions			137,260
3.	Total expected future assets (1. + 2.)			\$ 220,285
C.	Total current and expected future assets			\$ 783,331
D.	Current benefit obligations	<u>Non-Vested</u>	<u>Vested</u>	<u>Total</u>
1.	Benefit recipients			
a.	Service retirements	\$ 0	\$ 390,310	\$ 390,310
b.	Disability	0	18,999	18,999
c.	Survivors	0	45,502	45,502
2.	Deferred retirements with augmentation	0	6,632	6,632
3.	Former members without vested rights*	69	0	69
4.	Active members	1,887	225,313	227,200
5.	Total Current Benefit Obligations	\$ 1,956	\$ 686,756	\$ 688,712
E.	Expected Future Benefit Obligations			\$ 149,446
F.	Total Current and Expected Future Benefit Obligations			\$ 838,158
G.	Unfunded Current Benefit Obligations (D.5. – A.)			\$ 125,666
H.	Unfunded Current and Future Benefit Obligations (F. – C.)			\$ 54,827

* Former members with less than three years of service (five if first hired after June 30, 2010) that have not collected a refund of member contributions as of the valuation date.

B. Determination of Unfunded Actuarial Accrued Liability (UAAL)			
1. Actuarial accrued liability			\$ 700,898
2. Current assets (AVA)			563,046
3. Unfunded actuarial accrued liability			\$ 137,852
C. Determination of Supplemental Contribution Rate*			
1. Present value of future payrolls through the amortization date of July 1, 2036			\$ 1,043,961
2. Supplemental contribution rate (B.3. / C.1.)			13.20%**

* *The amortization of the unfunded actuarial accrued liability (UAAL) using the current amortization method results in initial payments less than the "interest only" payment on the UAAL. Payments less than the interest only amount will result in the UAAL increasing for an initial period of time.*

** *The amortization factor as of July 1, 2011 is 15.8142.*

Development of Costs

Changes in Unfunded Actuarial Accrued Liability (UAAL) (Dollars in Thousands)

	Year Ending June 30, 2011
A. Unfunded actuarial accrued liability at beginning of year	\$ 116,149
B. Changes due to interest requirements and current rate of funding	
1. Normal cost and administrative expenses	\$ 15,529
2. Contributions	(16,451)
3. Interest on A., B.1. and B.2.	9,833
4. Total (B.1. + B.2. + B.3.)	\$ 8,911
C. Expected unfunded actuarial accrued liability at end of year (A. + B.4.)	\$ 125,060
D. Increase (decrease) due to actuarial losses (gains) because of experience deviations from expected	
1. Salary increases	\$ (9,766)
2. Investment return	19,651
3. Benefit recipient mortality	3,072
4. Other items	(165)
5. Total	\$ 12,792
E. Unfunded actuarial accrued liability at end of year before plan amendments and changes in actuarial assumptions (C. + D.5.)	\$ 137,852
F. Change in unfunded actuarial accrued liability due to changes in plan provisions	\$ 0
G. Change in unfunded actuarial accrued liability due to changes in actuarial assumptions	\$ 0
H. Change in unfunded actuarial accrued liability due to changes in actuarial asset method	\$ 0
I. Unfunded actuarial accrued liability at end of year (E. + F. + G. + H.)*	\$ 137,852

* The unfunded accrued liability on a market value of assets basis is \$132,619.

Development of Costs

Determination of Contribution Sufficiency/(Deficiency) *(Dollars in Thousands)*

The annual required contribution (ARC) is the sum of normal cost, a supplemental contribution to amortize the Unfunded Actuarial Accrued Liability, and an allowance for expenses.

	July 1, 2011	
	Percent of Payroll	Dollar Amount
A. Statutory contributions – Chapter 352B		
1. Employee contributions	12.40%	\$ 8,188
2. Employer contributions	18.60%	12,283
3. Total	31.00%	\$ 20,471
B. Required contributions – Chapter 356		
1. Normal cost*		
a. Retirement benefits	19.37%	\$ 12,787
b. Disability benefits	2.17%	1,432
c. Survivors	0.88%	583
d. Deferred retirement benefits	0.41%	270
e. Refunds	0.08%	55
f. Total	22.91%	\$ 15,127
2. Supplemental contribution amortization by July 1, 2036 of Unfunded Actuarial Accrued Liability	13.20%	8,717
3. Allowance for expenses	0.14%	\$ 92
4. Total	36.25%**	\$ 23,936
C. Contribution Sufficiency/(Deficiency) <i>(A.3. – B.4.)</i>	(5.25%)	\$ (3,465)

Note: Projected annual payroll for fiscal year beginning on the valuation date: \$66,035

* Normal cost includes 1/2 year interest adjustment.

** The required contribution on a market value of assets basis is 35.75% of pay.

Actuarial Basis

Actuarial cost method

Actuarial Accrued Liability and required contributions in this report are computed using the Individual Entry Age Normal Cost Method. This method is prescribed by Minnesota Statutes.

The objective under this method is to fund each member's benefits under the Plan as payments which are level as a percentage of salary, starting at entry age, and continuing until the assumed date of retirement termination, disability or death. For valuation purposes, entry age for each member is determined as the age at valuation minus years of service as of the valuation date.

At any given date, a liability is calculated equal to the contributions which would have been accumulated if this method of funding had always been used, the current plan provisions had always been in place, and all assumptions had been precisely accurate. The difference between this liability and the assets (if any) which are held in the fund is the unfunded liability. The unfunded liability is typically funded over a chosen period in accordance with the amortization schedule.

A detailed description of the calculation follows:

The normal cost for each active member under the assumed retirement age is determined by applying to earnings the level percentage of salary which, if contributed each year from date of entry into the Plan until the assumed retirement (termination, disability or death) date, is sufficient to provide the full value of the benefits expected to be payable.

- The present value of future normal costs is the total of the discounted values of all active members' normal cost, assuming these to be paid in each case from the valuation date until retirement (termination, disability or death) date.
- The present value of projected benefits is calculated as the value of all benefit payments expected to be paid to the Plan's current members, including active and retired members, beneficiaries, and terminated members with vested rights.
- The accrued liability is the excess of the present value of projected benefits over the present value of future normal costs.
- The unfunded liability is the excess of the accrued liability over the assets of the fund, and represents that part of the accrued liability which has not been funded by accumulated past contributions.

Current Benefit Obligation is computed using the Projected Unit Credit cost method.

Decrement timing

All decrements are assumed to occur on the anniversary of the valuation date, beginning on the valuation date. Decrement timing is a fundamental part of the computer programming underlying actuarial calculations. Mercer's valuation systems use beginning of year decrements, a generally accepted actuarial practice. The Legislative Commission on Pensions and Retirement approved this modification to the Standards for Actuarial Work prior to the preparation of this report in order to ensure consistency and comparability.

Actuarial Basis

Asset valuation method

The assets are valued based on a five-year moving average of expected and market values (five-year average actuarial value) determined as follows:

- At the end of each plan year, an average asset value is calculated as the average of the market asset value at the beginning and end of the fiscal year net of investment income for the fiscal year;
- The investment gain or (loss) is taken as the excess of actual investment income over the expected investment income based on the average asset value as calculated above;
- The investment gain or (loss) so determined is recognized over five years at 20% per year;
- The asset value is the sum of the market asset value plus the scheduled recognition of investment gains or (losses) during the current and the preceding four fiscal years.

The Minnesota Post Retirement Investment Fund (MPRIF) was dissolved on June 30, 2009. For the purpose of determining the actuarial value of assets, the MPRIF asset loss for the fiscal year ending June 30, 2009 is recognized incrementally over five years at 20% per year, similar to the smoothing described above. Prior to June 30, 2009, MPRIF asset gains and losses were not smoothed.

Payment on the unfunded actuarial accrued liability

A level percentage of payroll each year to the statutory amortization date of July 1, 2036 assuming payroll increases of 4.50% per annum. If there is a negative Unfunded Actuarial Accrued Liability, the surplus amount shall be amortized over 30 years as a level percentage of payroll. Projected payroll is multiplied by 0.957 in the determination of the present value of future payroll to account for timing differences (as required by the Standards for Actuarial Work).

Funding objective

The fundamental financing objective of the fund is to establish contribution rates which, when expressed as a percentage of active member payroll, will remain approximately level from generation to generation and meet the required deadline for full funding.

Benefits included or excluded

To the best of our knowledge, all material benefits have been included in the liability.

IRC Section 415(b): The limitations of Internal Revenue Code Section 415(b) have been incorporated into our calculations. Annual benefits may not exceed the limits in IRC Section 415. This limit is indexed annually. For 2011, the limit is \$195,000.

IRC Section 401(a)(17): The limitations of Internal Revenue Code Section 401(a)(17) have been incorporated into our calculations. Compensation for any 12-month period used to determine accrued benefits may not exceed the limits in IRC Section 401(a)(17) for the calendar year in which the 12-month period begins. This limit is indexed annually. For 2011, the limit is \$245,000.

Changes in actuarial methods since prior valuation

None.

Actuarial Basis

Summary of actuarial assumptions

The following assumptions were used in valuing the liabilities and benefits under the plan. All actuarial assumptions are prescribed by Minnesota Statutes, the Legislative Commission on Pensions and Retirement (LCPR), or the MSRS Board of Directors. These parties are responsible for selecting the assumptions used for this valuation. The assumptions prescribed are based on the last experience study, dated June 2004.

The *Allowance for Combined Service Annuity* was based on a recommendation by a former actuary. We are unable to judge the reasonableness of this assumption without performing a substantial amount of additional work beyond the scope of the assignment.

The *Pre and Post-retirement Mortality Rates* that are prescribed by the LCPR are based on a table that is almost 30 years old. Mortality rates have improved since this table was adopted for use by the plan and are generally expected to continue to improve. Using this table as is does not comply with the guidance in Actuarial Standards of Practice Number 35 (ASOP 35), which requires an explicit assumption about mortality improvement, and if no mortality improvement is assumed after the valuation date, an explanation as to why. To the extent the rates in this table are too high, i.e. mortality has improved or will in the future, this report understates the plan's liabilities and required contributions.

In the event of a conflict between the Standards for Actuarial Work established by the LCPR and ASOP 35, the Standards require that the actuary for the Fund and the Commission's actuary review the situation to determine the approach to completing the valuations. We discussed this issue with Milliman, acting in their capacity as the Commission's actuary, and their preferred approach, as followed herein, is to use the prescribed mortality for 2011 valuations with commentary, and update the mortality assumption in 2012. An experience study has been authorized by MSRS and is scheduled to occur in 2012.

<i>Investment return:</i>	7.00% compounded annually post-retirement. 8.50% compounded annually pre-retirement.
<i>Benefit increases after retirement</i>	Payment of 1.5% annual benefit increases after retirement accounted for by using a 7.00% post-retirement assumption, as required by Minnesota Statute.
<i>Salary increases</i>	Reported salary at valuation date increased according to the rate table, to current fiscal year and annually for each future year. Prior fiscal year salary is annualized for new members.
<i>Mortality rates</i>	
<i>Healthy Pre-retirement</i>	1983 Group Annuity Mortality for males set back five years 1983 Group Annuity Mortality for females set back two years
<i>Healthy Post-retirement</i>	1983 Group Annuity Mortality for males set back two years 1983 Group Annuity Mortality for females set back one year
<i>Disabled</i>	Combined Annuity Mortality
<i>Retirement</i>	Members retiring from active status are assumed to retire according to the following age related rates. Members who have attained the highest assumed retirement age are assumed to retire in one year.
	Ages: 50-54 7.0%
	55 60.0%
	56 40.0%
	57-59 20.0%
	60 & over 100.0%

Actuarial Basis

Summary of actuarial assumptions *(continued)*

<i>Withdrawal</i>	Select and ultimate rates are based on plan experience. Ultimate rates after the third year are shown in the rate table. Select rates are 2.5% for the first three years of employment.
<i>Disability</i>	Rates adopted by MSRS as shown in rate table. Benefits are calculated assuming all future disabilities are occupational disabilities.
<i>Payroll growth</i>	4.50% per annum.
<i>Allowance for Combined Service Annuity</i>	Liabilities for former members are increased by 30.00% to account for the effect of some participants having eligibility for a Combined Service Annuity.
<i>Administrative expenses</i>	Prior year expenses expressed as percentage of prior year payroll.
<i>Return of contributions</i>	All employees withdrawing after becoming eligible for a deferred benefit are assumed to take the larger of their member contributions accumulated with interest or the value of their deferred benefit.
<i>Commencement of deferred benefits</i>	Members receiving deferred annuities (including current terminated deferred members) are assumed to begin receiving benefits at age 55.
<i>Percentage married</i>	100% of members are assumed to be married.
<i>Age of spouse</i>	Female spouses are assumed to be three years younger than males.
<i>Eligible children</i>	Each member is assumed to have two children whose ages are dependent upon the member's age. First child is assumed to be born at member's age 28 and second child is born at member's age 31.
<i>Form of payment</i>	<p>Married members retiring from active status are assumed to elect subsidized joint and survivor form of annuity as follows:</p> <p>Males: 25% elect 50% Joint & Survivor option 0% elect 75% Joint & Survivor option 25% elect 100% Joint & Survivor option</p> <p>Females: 5% elect 50% Joint & Survivor option 0% elect 75% Joint & Survivor option 5% elect 100% Joint & Survivor option</p> <p>Unmarried and remaining married members retiring from active status are assumed to receive life annuities.</p> <p>Members receiving deferred annuities (including current terminated deferred members) are assumed to elect a life annuity.</p> <p>Surviving spouses are assumed to receive a life annuity equal to 50% of average pay if death occurred before age 55. If death occurred on or after age 55, surviving spouses are assumed to receive a life annuity equal to the survivor portion of the 100% joint and survivor annuity.</p>

Actuarial Basis

Summary of actuarial assumptions *(continued)*

<i>Unknown data for certain members</i>	<p>To prepare this report, Mercer has used and relied on participant data supplied by the Fund. Although Mercer has reviewed the data in accordance with Actuarial Standards of Practice No. 23, Mercer has not verified or audited any of the data or information provided.</p> <p>There are no members reported with missing gender or birth dates. In cases where submitted data was missing or incomplete, the following assumptions were applied:</p> <p><u>Data for active members:</u></p> <p>There was one member reported with missing salary and no members reported with missing service; due to the small number of members with missing salary and/or service, and based on direction from MSRS, we made no adjustment to the reported data for active members.</p> <p><u>Data for terminated members:</u></p> <p>There were three members reported without a benefit. If available, we calculated benefits for these members using the reported Average Salary and credited service. If Average Salary was also not reported (1 member), we assumed a value of \$30,000. There were no members reported without credited service or a termination date.</p> <p><u>Data for members receiving benefits:</u></p> <p>There were no members reported without a benefit.</p>
<i>Changes in actuarial assumptions</i>	<p>None.</p>

Summary of plan provisions

Following is a summary of the major plan provisions used in the valuation of this report. MSRS is solely responsible for the validity, accuracy and comprehensiveness of this information. If any of the plan provisions shown below are not accurate and complete, the valuation results may differ significantly from those shown in this report and may require a revision of this report. Moreover, these plan provisions may be susceptible to different interpretations, each of which could be reasonable, and that the different interpretations could lead to different valuation results.

<i>Plan year</i>	July 1 through June 30		
<i>Eligibility</i>	State troopers, conservation officers and certain crime bureau and gambling enforcement officers.		
<i>Contributions</i>		<u>Member</u>	<u>Employer</u>
	Percent of salary:	12.40%	18.60%
	Member contributions are “picked up” according to the provisions of Internal Revenue Code 414(h).		
<i>Allowable service</i>	Service during which member contributions were deducted. Includes period receiving temporary Worker’s Compensation and reduced or no salary from employer.		
<i>Salary</i>	Salaries excluding lump sum payments at separation.		
<i>Average salary</i>	Average of the five highest years of Salary. Average Salary is based on all Allowable Service if less than five years.		
Retirement			
<i>Normal retirement benefit</i>			
<i>Age/service requirements</i>	Age 55 and three years (five years if first hired after June 30, 2010) of Allowable Service.		
<i>Amount</i>	3.00% of Average Salary for each year of Allowable Service.		
<i>Early retirement benefit</i>			
<i>Age/service requirements</i>	Age 50 and three years (five years if first hired after June 30, 2010) of Allowable Service.		
<i>Amount</i>	Normal Retirement Benefit based on Allowable Service and Average Salary at retirement reduced by 1/10% (1/5% for employees first hired after June 30, 2010) for each month that the member is under age 55.		
<i>Form of Payment</i>	Life annuity. Actuarially equivalent options are: 50%, 75%, 100% Joint and Survivor with bounce back feature without additional reduction, or 15-year certain.		
<i>Benefit increases</i>	Benefit recipients receive future annual 1.5% benefit increases. When the funding ratio reaches 90% (on a Market Value of Assets basis), the benefit increase will revert to 2.5%. A benefit recipient who has been receiving a benefit for at least 18 full months as of December 31 will receive a full increase. Members receiving benefits for at least six full months but less than 18 full months will receive a pro rata increase. Members who retired under laws in effect before June 1, 1973 received an additional lump sum payment each year until 2002. Effective January 1, 2002 annual lump sum payment was divided by 12 and paid as a monthly life annuity in the annuity form elected.		

Actuarial Basis

Summary of plan provisions (*continued*)

Disability	
<u>Occupational disability benefit</u>	
<i>Age/service requirement</i>	Member who cannot perform his duties as a direct result of a disability relating to an act of duty.
<i>Amount</i>	60% of Average Salary plus 3.00% of Average Salary for each year in excess of 20 years of Allowable Service (pro rata for completed months). Payments cease at age 65 or earlier if disability ceases or death occurs. Benefits may be paid upon re-employment but salary plus benefit cannot exceed current salary of position held at time of disability.
<u>Non-duty disability benefit</u>	
<i>Age/service requirement</i>	At least one year of Allowable Service and disability not related to covered employment.
<i>Amount</i>	Normal Retirement Benefit based on Allowable Service (minimum of 15 years) and Average Salary at disability without reduction for commencement before age 55. Payments cease at age 65 or earlier if disability ceases or death occurs. Benefits may be paid upon re-employment but salary plus benefit cannot exceed current salary of position held at time of disability.
<u>Retirement after disability</u>	
<i>Age/service requirement</i>	Age 65 with continued disability.
<i>Amount</i>	Optional annuity continues. Otherwise, normal retirement benefit equal to the disability benefit paid, or an actuarially equivalent option.
<i>Form of payment</i>	Same as for retirement.
<i>Benefit increases</i>	Same as for retirement.
<hr/>	
Death	
<u>Surviving spouse benefit</u>	
<i>Age/service requirement</i>	Member who is active or receiving a disability benefit or former member.
<i>Amount</i>	50% of Average Salary if member was active or occupational disability and either had less than three years (five years if first hired after June 30, 2010) of Allowable Service or was under age 55. Annuity is paid for life. Surviving spouse receives the 100% joint and survivor benefit commencing on the member's 55th birthday if member was active or a disability with three years (five years if first hired after June 30, 2010) of Allowable Service. A spouse who had been receiving the 50% benefit shall be entitled to the greater benefit. The surviving spouse of a former member receives the 100% joint and survivor benefit commencing on the member's 55th birthday if former member had three years (five years if first hired after June 30, 2010) of Allowable Service.
<i>Benefit increases</i>	Same as for retirement.

Actuarial Basis

Summary of plan provisions *(continued)*

Death *(continued)*

Surviving dependent children's benefit

<i>Age/service requirement</i>	Member who is active or receiving a disability benefit. Child must be unmarried, under age 18 (or 23 if full-time student) and dependent upon the member.
<i>Amount</i>	10% of Average Salary for each child and \$20 per month prorated among all dependent children. Benefit must not be less than 50% nor exceed 70% of Average Salary.
<i>Benefit increases</i>	Same as for retirement.

Refund of contributions

<i>Age/service requirement</i>	Member dies before receiving any retirement benefits and survivor benefits are not payable.
<i>Amount</i>	Member contributions with 6.00% interest compounded daily until June 30, 2011 and 4.00% thereafter.

Termination

Refund of contributions

<i>Age/service requirement</i>	Termination of state service.
<i>Amount</i>	Member contributions with 6.00% interest compounded daily to June 30, 2011 and 4.00% thereafter. If a member is vested, a deferred annuity may be elected in lieu of a refund.

Deferred benefit

<i>Age/service requirement</i>	Three years (five years if first hired after June 30, 2010) of Allowable Service.
<i>Amount</i>	Benefit computed under law in effect at termination and increased by the following annual augmentation percentage: <ul style="list-style-type: none"> (a.) 0.00% before July 1, 1971; (b.) 5.00% from July 1, 1971 to January 1, 1981; (c.) 3.00% thereafter (2.50% if hired after June 30, 2006) until January 1, 2012; and (d.) 2.00% after December 31, 2011 until the annuity begins. Amount is payable at normal or early retirement. If a member terminated employment prior to July 1, 1997 but was not eligible to commence their pension before July 1, 1997, an actuarial increase shall be made for the change in the post-retirement interest rates from 5.00% to 6.00%.

Actuarial Basis

Summary of plan provisions *(continued)*

<i>Optional form conversion factors</i>	Actuarially equivalent factors based on 1983 Group Annuity Mortality blended 75% male and 25% female (set forward two years), and 6% interest.
<i>Combined Service Annuity</i>	<p>Members are eligible for combined service benefits if they:</p> <ul style="list-style-type: none"> (a.) Has sufficient allowable service in total that equals or exceeds the applicable service credit vesting requirement of the retirement plan with the longest applicable service credit vesting requirement; and (b.) Have at least six months of allowable service credit in each plan worked under (c.) Are not in receipt of a benefit from another plan, or have applied for benefits with an effective date within one year. <p>Members who meet the above requirements must have their benefit based on the following:</p> <ul style="list-style-type: none"> (a.) Allowable service in all covered plans are combined in order to determine eligibility for early retirement. (b.) Average salary is based on the high five consecutive years during their entire service in all covered plans.
<i>Changes in Plan Provisions</i>	Member contributions increased to 12.4% and employer contributions increased to 18.6% beginning July 1, 2011.

Plan Accounting Under GASB 25 (as amended by GASB 50)

Provided below is information required under GASB Statement No. 25 as amended by GASB Statement No. 50 – Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans as amended by GASB Statement No. 50.

Schedule of Funding Progress¹ (Dollars in Thousands)

¹ Information prior to 2008 provided by The Segal Company.

² Includes contributions from other sources (if applicable)

³ Actuarially Required Contributions calculated according to parameters of GASB 25 using a 30-year amortization of the negative unfunded actuarial accrued liability.

⁴ Actuarially Required Contributions Rate prior to change in Asset Valuation Method is 15.15%.

⁵ Actuarially Required Contribution Rate prior to change in Actuarial Assumptions is 14.20%.

⁶ Actuarially Required Contribution Rate prior to change in Actuarial Assumptions is 21.76%.

⁷ Actuarially Required Contribution Rate prior to change in Asset Valuation Method is 27.02%.

⁸ Actuarially Required Contribution Rate provided by The Segal Company.

⁹ Equal to actual earnings for active members as of the valuation date (annualized for members with less than one year of service).

¹⁰ Actuarially Required Contribution Rate prior to change in Actuarial Assumptions is 34.97%.

¹¹ Equal to actual earnings for active members as of the valuation date.

¹² Actuarially Required Contribution Rate prior to change in Asset Valuation Method is 40.26%.

¹³ Actuarially Required Contribution Rate prior to change in plan provisions is 42.16%.

¹⁴ Assumed equal to actual member contributions divided by 10.4%.

Glossary

Actuarial Asset Value. The value of assets used in calculating the required contributions. The actuarial asset value may be equal to the fair market value of assets, or it may spread the recognition of certain investment gains or losses over a period of years in accordance with an asset valuation method. The goal of an asset valuation method is to produce a relatively stable asset value thereby reducing year-to-year volatility in contribution requirements.

Actuarial Cost Method. Sometimes called “funding method,” a particular technique used by actuaries to establish the amount and incidence of the annual actuarial cost of pension plan benefits, or normal cost, and the related unfunded actuarial accrued liability. Ordinarily, the Annual Required Contribution (ARC) calculated for plan financial reporting is established by the actuarial cost method and comprises the normal cost and an amount for amortization of the unfunded actuarial accrued liability.

Annual Pension Cost. A measure of the periodic cost of an employer’s participation in a defined benefit pension plan.

Annual Required Contributions (ARC). The employer’s recommended annual contribution to a defined benefit pension plan, calculated in accordance with the parameters of GASB 25 (as amended by GASB 50) or GASB 27. The ARC for a given fiscal reporting period is affected by the specific actuarial cost method selected by the plan sponsor.

ASA. Associate of the Society of Actuaries.

Augmentation. Annual increase to deferred benefits.

Current Benefit Obligations. The present value of benefits earned to the valuation date, based on current service and including future salary increases to retirement.

EA. Enrolled Actuary.

FSA. Fellow of the Society of Actuaries.

MAAA. Member of the American Academy of Actuaries.

Normal Cost. The annual cost assigned to the current year, under the actuarial cost method in use.

Present Value. Sometimes called “actuarial present value,” the current worth (on the valuation date) of an amount or series of amounts payable or receivable in the future. The present value is determined by discounting the future payments at a predetermined rate of interest, taking into account the probability of payment.

Statement No. 25 of the Governmental Accounting Standards Board (GASB 25). The accounting standard governing the financial reporting for defined benefit pension plans and note disclosures for defined contribution plans.

Statement No. 27 of the Governmental Accounting Standards Board (GASB 27). The accounting standard governing a state or local governmental employer’s accounting for pensions.

Statement No. 50 of the Governmental Accounting Standards Board (GASB 50). The accounting standard amending both GASB 25 and GASB 27 to require a schedule of funding progress under the Entry Age Normal method for plans that use the aggregate funding method to determine the Annual Required Contribution.
