I.	FIRM / ACTUARY EXPRESSED UNDERSTANDING OF CONTRACT RESPONSIBILITIES	Max Points Allowed 10	Points Awarded	
	CONSIDERATIONS:			
	How well does the proposal respond to the specifications of the RFP?			
	Is respondent's restatement of engagement scope & objectives consistent with RFP?			
	Are responsibilities and deliverables clearly stated?			
	If the responder's understanding of responsibilities differs from RFP, are those differences highlighted and rationale given?			
	TOTAL POINTS	10	8	
Comments / Concerns / Questions:				
Though probably done as a "place holder", the EFI proposal refers to "Public Employees				
Retirement Association of Minnesota" as the client rather than all 7 public funds. EFI seems to understand the LCPR structure.

II.	APPROACH & WORK PLAN	Points	Points
	CONCIDEDATIONS	Allowed	Awarded
	CONSIDERATIONS:	20	
	Is the work plan realistic? Are timetables and tasks attainable, both the first year and subsequent years?		
	Can the respondent accommodate extemporaneous requests by the funds or LCPR?		
	Has the responder proposed an adequate number of personnel with appropriate skills to effectively provide expected contract deliverables?		
	If applicable, how well do proposed additional tasks or activities improve services?		
	Can the firm accommodate earlier deadlines?

IV.	ACTUARIAL FIRM	Points	Points		
	QUALIFICATIONS	Allowed	Awarded		
	CONSIDERATIONS:	25			
	CONSIDERATIONS.				
	Are key personnel able to begin work 7/1/05?				
	Is firm stable? Good reputation? Experience working with large public pension plans?				
	Does the firm have a suitable organization structure to ensure completion of contract obligations if key personnel leave?				
	Is the firms' location suitable to promote timely exchange of information and service delivery?				
	Is the technological infrastructure adequate?				
	TOTAL POINTS	25	20		
Comments / Concerns / Questions:					
EFI has been in existence since 1990. Edward Friend & Company was created in 1961.					
Works with 90 public retirement systems, but only 2 listed are at the state level (CalPERS					
and Massachusetts Teachers) and they no longer work with Mass. Teachers. Most					
plans are smaller cities.					
Small number of employees, so teamed up with Cheiron, another small firm. Since Ed					
Friend is essentially EFI, if something happened to Mr. Friend, EFI might no longer exist. Cheiron is less than 2 years old, formed by former Milliman employees.					
<u> </u>		p.0)000.

III. ASSIGNED ACTUARY'S **Points Points QUALIFICATIONS** Allowed Awarded 30 **CONSIDERATIONS:** Do the assigned actuaries have public plan experience? What's their reputation? Do key staff assigned to this engagement have necessary skills and experience? Do key staff appear to be "overbooked"? Are there adequate backups in place? Will the key staff be accessible for meetings? Does the firm have necessary resources/expertise to provide advice & research to the funds regarding changes in the industry, and changes/developments in federal legislation? Does the firm play an active role in this arena? **TOTAL POINTS** 25 30 Comments / Concerns / Questions: Lead EFI actuaries have lots of actuarial experience. Ed Friend has experience working with legislative commissions. Lead Cheiron actuaries have lots of experience working with state plans while they were with Milliman. Backups may be a problem since both firms have a small staff.

V.	COST	Max Points	Points	
		Allowed 15	Awarded	
	CONSIDERATIONS:	15		
	Is the proposal financially affordable?			
	How does the bid compare to other firms bidding on this contract?			
	Are there any "hidden costs" that could escalate? Does the proposal include all costs, including set-up fees, database maintenance, etc?			
	TOTAL POINTS	15	5	
Comments / Concerns / Questions:				
Costs are nearly double the costs of Segal and Milliman for the 3 year period. EFI is the most expensive of the 4 firms being evaluated.				
ET 113 the most expensive of the 4 mins being evaluated.
